

Bevi Filtration System

The Standup Bevi and Countertop Bevi units utilize a high capacity, activated carbon filtration system.

Specifications

This reliable high-volume fine filtration system is commonly found in commercial applications, where water safety and taste are crucial.

- Certified under NSF/ANSI Standard 42
- Eliminates 99.95% of protozoan bacteria
- Removes more than 90% of chlorine
- Reduces lead, volatile organic compounds, foul odor, and foul tastes from the water
- Retains essential minerals in drinking water, unlike reverse osmosis (RO)
- Does not require the installation of drains, unlike reverse osmosis (RO)
